Popularity and Watch Hours

Total Watch Hours and Count of Viewing_Record_ID by Platform and Popularity...

NetStream has the highest Watch Hours, but its content shows relatively low Popularity Scores. This indicates that NetStream has highly engaging content that may not be receiving enough visibility. Therefore, NetStream content should be promoted more aggressively and recommended more frequently to increase its reach and popularity.

For Outliers Review investment or catalogue positioning.

AmazePrime has some content with relatively high Popularity Scores but very low Watch Hours. This content should be reviewed to understand whether marketing and promotional activities are attracting users initially but failing to generate sustained viewing. Management should review the investment and catalogue positioning of such content

Premium	121	158	145	107	128	659
Total	392	418	412	352	426	2000

Key Insights

- Free Trial Risks:** Free trial users are **40% more likely to churn**.
- Premium Loyalty:** Premium subscribers reduce churn by **38%**.
- Data Loop:** Renewal Status directly mirrors churn (exclude to fix model).

Actionable Takeaways

- Convert Trialists:** Send targeted offer triggers midway through trials to boost paid conversions.
- Push Premium Upgrades:** Drive active users toward Premium plans using in-app prompts.
- Clean Visual Inputs:** Remove Renewal Status from the visual's input fields to isolate actionable drivers.

Total Watch Hours, Average Rating and Total Views
by Title and Platform

Key Insight: Ratings don't drive watch hours—most titles cluster under 100 hours, while AmazePrime dominates the highest watch-hour outliers for a particular Movie.

Actionable Takeaway: Promote high-rated (5-star) low-volume titles on home carousels and analyze top outlier titles (200+ hours) to replicate their success.

OTT Streaming Platform

Business Insights, Actionable Insights & Recommendations

Page 1 – Executive Overview

#	Visual	Business Insight	Actionable Insight	Recommendation
1	 Total Users 2K	The platform has a customer base of approximately 2,000 users.	Monitor user growth and identify which segments contribute most to the customer base.	Focus acquisition and engagement strategies on high-potential customer segments.
2	 Total Content 18K	The platform has a large content catalogue of approximately 18K titles.	Evaluate whether the available catalogue is being effectively consumed by users.	Prioritize high-performing content and improve discovery of under-watched titles.
3	 Total Views 30K	The platform records approximately 30K viewing activities, indicating active content consumption.	Compare views with watch hours to distinguish traffic from sustained engagement.	Evaluate content performance using both views and watch hours rather than views alone.
4	 Retention Rate 55.60%	Approximately 55.6% of users are retained, while 44.4% are churned.	Identify the subscription and customer segments associated with higher churn.	Strengthen retention campaigns, particularly for high-risk and renewal-stage users.
5	 Average Watch Minutes 181	Users watch an average of approximately 181 minutes, indicating meaningful viewing activity.	Compare average watch time across content types, platforms and customer segments.	Use viewing behavior to improve personalized recommendations and engagement strategies.
6	 Average Rating 3.01	The overall average rating is approximately 3.01, indicating moderate customer satisfaction.	Identify titles, genres and platforms with ratings significantly above or below the overall average.	Promote highly rated content and investigate recurring issues in lower-rated content.
7	 Total Watch Hours by Year	Watch hours decline from 2022 to 2023, recover in 2024 and decline again in 2025.	Investigate which platforms, content types and titles caused the changes in engagement.	Replicate strategies from stronger periods and take corrective action during declining periods.
8	 Churned vs Retained Users ● Churned (44.4%) ● Retained (55.6%)	44.4% are churned and 55.6% are retained, showing that almost half of the users have churned.	Analyze churn by subscription type, renewal status, region and engagement behavior.	Implement targeted retention strategies instead of a one-size-fits-all approach.
9	 Watch Hours & Views by Platform ■ NetStream ■ AmazePrime ■ DizPlay+	NetStream has the highest watch hours, while AmazePrime follows and DizPlay+ contributes much less. The number of views and watch hours should be evaluated together.	Identify why NetStream generates stronger sustained engagement and what limits engagement on other platforms.	Prioritize high-engagement platform-content combinations and improve recommendations on weaker platforms.
10	 Total Watch Hours by Content Type ■ Movies (21,862) ■ TV Shows (72,574.87)	TV Shows generate substantially more watch hours than Movies.	Identify the TV Show genres and titles driving this higher engagement.	Strengthen investment, recommendations and promotions around high-performing TV Show content.
