

# OTT Streaming Platform Viewing Analysis Dashboard

This dashboard analyses user demographics, viewing behaviour, content performance, subscriptions, churn, ratings and feedback across the OTT streaming platform datasets.

## Key Performance Indicators

| Active Users | Viewing Records | Watch Hours | Avg Completion | Average Rating |
|--------------|-----------------|-------------|----------------|----------------|
| 2,000        | 30,000          | 90,499      | 52.4%          | 3.01/5         |

1

### Which OTT platform generates the highest viewer engagement?

Total Watch Hours by OTT Platform

Narration: This visualization compares total viewer engagement across OTT platforms using watch hours. Platforms with higher watch hours are generating stronger overall audience engagement.

2

### Do Movies or TV Shows generate stronger engagement?

Movies vs TV Shows: Views and Watch Hours

Narration: Views measure traffic volume while watch hours represent depth of engagement. Comparing both metrics helps determine whether Movies or TV Shows create stronger audience consumption.

3 Which age group shows the strongest viewing engagement?

Average Watch Duration by Age Group

Narration: The chart shows how viewing behaviour varies across age groups. Age segments with higher average watch duration represent more engaged audience groups and can support targeted content strategy.

4 Which device type produces the highest completion rate?

Average Completion Percentage by Device

Narration: Completion percentage indicates how consistently users finish the content they start. Device-level differences can help identify where audiences demonstrate stronger viewing engagement.

5 At what time of day is viewer engagement highest?

Viewing Activity by Time of Day

Narration: This analysis identifies peak OTT consumption periods. Understanding when users watch content can help schedule new releases, promotions and personalized recommendations.

## 6 Which content titles generate the most viewing activity?

Top 10 Most Viewed Content Titles

Narration: The chart highlights the content titles attracting the highest number of viewing records. These titles represent strong audience demand and can guide future acquisition and recommendation decisions.

## 7 Which genres attract the most viewers?

Top 10 Genres by Viewing Records

Narration: Genre demand reveals the content categories preferred by the audience. High-performing genres can support investment, recommendation and acquisition decisions.

8 Which subscription type has the highest churn risk?

Churn Rate by Subscription Type

Narration: Churn rate measures the percentage of users leaving each subscription plan. Plans with high churn require stronger retention strategies, engagement offers or pricing interventions.

9 How satisfied are viewers with the content?

Viewer Rating Distribution

Feedback Category Distribution

Narration: Ratings and feedback provide direct evidence of user satisfaction. Positive feedback and higher ratings indicate stronger content acceptance, while negative feedback highlights improvement areas.

10 Is watch duration related to content completion?

Watch Duration vs Completion Percentage

Correlation between Watch Duration and Completion Percentage: 0.220

Narration: The scatter plot tests whether longer watch durations are associated with higher completion percentages. A weak relationship indicates that watch duration alone does not fully explain completion behaviour.
